

EXPLORING EDUCATIONAL RESOURCES

Use this worksheet to assist you in compiling a list of suitable Educational Resources that will assist you in forming a Postsecondary Pathway Plan:

- Based on what you know about yourself at this moment in time and the opportunities available to you, what occupations or careers are of interest to you? Based on observation and research what occupations or careers have been suggested as being the most suitable given your skills set and interests?
- Does this occupation or career require specific education requirements or involve any specialized training? If so, research the requirements.
- Where can you get the education or training for this occupation or career? Research!

As you find this information, fill in the chart below. Feel free to create further charts if you are researching more than three occupation or career choices.

Occupation/Career	Option #1:	Option #2:	Option #3:
Why would this occupation or career be suitable to you? List all sources of information that directed you to this occupation or career choice			
Education or Training Requirements: List all sources of information that indicated to you that these requirements existed.			
Postsecondary Education or Training: List all of the organizations, institutions, internships, apprenticeships or mentorships available to meet the education or training requirements. (Include website addresses, email addresses, phone numbers, contact names, and other related details.)			
Other Resources: List any other resources you find that have assisted you with your research (such as Union information, OSAP requirements, scholarship and bursary sources, and other related items)
